**Talk1: Dr. Amalesh Gope**

**Title:** The Horizons of Computational Linguistics: With reference to Prosody and Image Processing

**Abstract:** In this talk, I will discuss the different aspects of Computational linguistics and present the recent developments in computational linguistics in terms of Indian languages. This talk will elaborate on the applications and importance of computational linguistics and correlate with other allied branches, including Cognition and AI, biomedical, and pathology. Lastly, I will discuss the complexities and limitations of CL when it comes to developing computational tools for Indian languages.

June 6, 1:00pm IST
