

About IIRS

The Indian Institute of Remote Sensing (IIRS) is a Unit of Indian Space Research Organisation, Department of Space, Government of India. Established in 1966, it is the premier training and education institute dealing with Remote Sensing, Geo-Information Science & GPS Technology and their applications. IIRS endeavour has been to bring thematic experts from user community including academic institutions and train them in geospatial technology & applications with the overall goal of 'technology transfer.' Institute has gained rich experience over the last 46 years in capacity building and implemented many innovative programs tuned to the different needs of various target groups. Satellite based Distance Learning Programs are primarily launched for university students.

**Satellite based Distance Learning Program
on "Hyperspectral Remote Sensing"
(13 February - 30 March 2012)**
