## *From the Desk of the Vice-Chancellor*

*Assam University, in its short period of existence of eighteen years, has made enviable strides and achieved recognition as one of the premier institutions of higher education in the North-East. As the university moves into the first phase of the twelfth five year plan, the task is not only to stabilize the past efforts, but also to identify areas of priority in a fast changing world of higher education. Increased competition due to the expected arrival of global players has made the task all the more difficult. Of course, a modest beginning has been made during the last few months starting from June 2012. The immediate priority was to publish the TDC and post graduate examination results which were long overdue. By the time the autumn break started, most results were announced and moderation of question papers of most examinations of odd semesters was completed. In addition, committees with senior professors have been set up to streamline the admission process at the post graduate level and also to redraft the regulations of the Integrated Ph.D Programme to collate them with the existing regulations enunciated by the University Grants Commission. The new regulations are likely to enable transfer of course work credits to other universities. In order to speed up the publication of TDC results, the entire examination system is being revamped by involving more and more college teachers in the process and also opting for decentralization of the evaluation work.*

*The Diphu campus is accorded more attention than ever before. Existing departments will move into new buildings once the construction work is complete. Roads are built and regular water supply will be ensured. At the same time, the Silchar campus will also witness a spree of construction activities like new hostels for boys and the completion of the international guest house, to mention a few. Roads within the campus will be re-laid and a solar power plant to meet the energy requirements is being thought of. Plans are also afoot to map aquifers in the campus for a regular water supply to all the buildings that are now facing shortage of water due to expansion of academic programmes in the last few years, possibly through water harvesting.*

*The university will soon embark upon launching a string of new academic initiatives. New courses of market relevance will go on stream from the next academic session as soon as formal procedures are over, keeping in view the employment opportunities they can generate. In tune with the directive of the Ministry of Human Resource Development, the university has plans to establish a community college in Silchar and the college is expected offer under graduate and diploma courses from the next academic session of 2013. The community college will cater to the below average students, who cannot join the general educational programmes. These students will be trained in vocational skills especially dove-tailed to the service sector. For all practical purposes, the community college is a middle course between polytechnics and general academic institutions*

*No doubt, an academic institution like Assam University must be known for its quality education to attract the best talents both within and outside the country. The efforts in the coming days will be to create a brand image by reforming the course curricula of different disciplines and also by providing high class facilities, both educational and residential. The main idea is to create a student-centric academic institution, dotted with knowledge production centres. The task is gigantic and demands active participation of all stakeholders-students, teachers, the non-teaching staff and also the general public at large, for public opinion is the mainstay of all public sector institutions.*

*The present annual report reflects the work already done. The new roadmap for the all-round development of the university is on the anvil and will definitely encompass the welfare of the disadvantaged sections of the society, as a direct response to the national policy of social inclusiveness. I earnestly trust the new policy initiatives will usher in a qualitative change in the institutional structure of Assam University in the years to come. The aim is ambitious, but surely achievable.*

### Department of Hindi

Year of Establishment : 1998  
Head of the Department : Dr. Krishna Mohan Jha

#### Research & Development activities:

The Department of Hindi was established in the transit accommodation in 1998 with Masters Degree Programme in Hindi. The Department has been offering PhD Programmes since 2001. The first batch of M. Phil course started in January 2007.

The department is situated in a university which has unique feature of being in a linguistically and culturally diverse milieu. Assam state has its neighbours all the north eastern provinces (Manipur, Mizoram, Tripura, Meghalaya, Nagaland and Arunachal Pradesh) apart from Bangladesh. That's why linguistic and cultural diversity is its defining feature. Barak Valley has Bangla as its main language. After that Manipuri, Hindi and other languages follow. Dimasa, Khasi, Hamar, Kuki, Naga are the tribal languages of the area. Tea garden labourers are Santhal, Munda, Oraon and Oriya speaking apart from Bhojpuri (A dialect of Hindi) speaking population.

Students of the Department are from all these different linguistic backgrounds. Hindi as national and official language has a definite role to play in this remote area.

Before opening of Hindi department in Assam University there was no system of Hindi teaching in this region at higher level. At present the university is not only running P.G level courses in Hindi but the department is also working as nodal centre in Hindi teaching in affiliated colleges. Teaching and research in Hindi at university level in itself is an achievement in this remote region of North east India (i.e. Barak valley). This has not only helped to integrate the people of this region with wider Hindi linguistic and literary scenario but it has also helped in establishing dialogue between Hindi and different societies, their culture, language and literature which is significant for national unity and integrity while developing knowledge. In this background the thrust area of the department is as follows-

- A) Contemporary Hindi Literature and its interaction with other Indian Languages and their Literature.
- B) Socio-linguistics.
- C) Nineteenth century Hindi literature and Renaissance.
